|---|---------------------------------------|
| <b>Subject:</b> Design Technology             | <b>Year Groups:</b> 7 - 11            |
| <b>Subject Leader:</b> D. Wharton & L. Gordon | <b>Grouping Policy:</b> Mixed ability |
| <b>Number of lessons per week:</b> 2          | <b>Assessment:</b> Teacher assessment |

**Course Content:**

Students will produce a variety of high quality products using different materials. In the process, students will learn how to work safely in the workshop environment. They will learn to operate a range of tools and machinery.

Students will participate in progressive units of work throughout the placement. These include:

- Personalised wall hanging
- Hand cast impression
- Clock
- Bird box
- Small storage box
- Seasonal themed competitions
- Potential for individual projects to support examination level resistant materials

Students develop social and emotional skills. They develop self-worth and confidence when they successfully complete each project.

Examples of student work:
